SKILLS

LANGUAGES	C#.NET, Ruby, Python, JavaScript, T-SQL, Java
DEVOPS	Jenkins CI, Git/GitHub, Rake, MSBuild, GIS service management, GIS data management routines, TFS
GEOSPATIAL TECHNOLOGY	ESRI ArcGIS Platform, Enterprise GIS Architecture, Leaflet
SYSTEMS ADMINISTRATION	Microsoft SQL Server 2008+, Windows Server, ArcGIS Server
OTHER TECHNOLOGIES	Angular 1.x, XAML (WPF/Silverlight), HTML/JS/CSS, Nancy, Visual Studio

EXPERIENCE

Resource Data, Inc.

Senior Programmer/Analyst (GIS) Aug 2014 - Present

Programmer/Analyst (GIS) Dec 2012 - Aug 2014

I develop custom business solutions using industry best-practices, with a strong emphasis on geospatial technologies

- Developer, Geospatial Lead for AlertSense from April 2016; Designed and implemented geofencing capability for alert triggering, display and management of customer geospatial data including asset and user locations; contributed as a member of an agile full-stack development team.
- Lead Developer for J.R. Simplot Company Corporate GIS Division from May 2015 through March 2016; successfully upgraded corporate GIS infrastructure; coordinated upgrade effort across multiple teams to ensure required applications updated in sync; implemented Portal for ArcGIS across Enterprise; Architected and built automated aerial imagery processing solution replacing a collection of manually coordinated scripts.
- Lead Developer for Alaska Gasline Development Corporation GIS Division from January 2013 through May 2015; developed and maintained custom GIS web portal which provides access to webmaps and metadata from Enterprise GIS infrastructure; directed infrastructure team in proper maintenance of GIS assets; provided recommendations to business; utilized and enforced industry standards for data governance and development workflows.

City of Auburn

Programmer/Analyst (GIS) Jan 2012 - Nov 2012

Chiefly responsible for city's interactive mapping applications. Led development of a new general-purpose, public-facing web application. Developed new data-driven enterprise mapping application for water quality data management, replacing a legacy spreadsheet workflow with multiple potential points of failure and lack of organizational transparency.

Alexander City, Public Works

GIS Coordinator Apr 2011 - Feb 2012

Responsible for city-wide GIS infrastructure, data management, and policy. Successfully led campaign to organize City's Information Technology department. Instrumental in making key design decisions. Laid foundation for city's eventual adoption of enterprise GIS.

BYU Harold B. Lee Library

GIS Specialist Mar 2010 - Apr 2011

Researched, designed, and prototyped implementation of ArcGIS Enterprise platform for library-wide use. Worked directly with Geospatial Librarian to gather requirements for implementation.

EDUCATION

Brigham Young University

Graduated Apr 2011

Bachelor of Science - Geography, GIS
